

# Is there any legitimacy left for the Arab armies?

By:

Sheikh Abu AbduliLah Ahmed Al-Jijeli Al-Jazairi

– may Allah preserve him –

بسم الله الرحمن الرحيم وصل اللهم وسلم على سيدنا محمد و آله وصحبه أجمعين

The Arab armies consistently from several decades to promote lustrous slogans, like protecting the country, and guarding the borders, and defending the interests of the people or Ummah, and what increased their deceiving of the people their false claim that they are the inheritor of the revolutions and scion of the liberation armies from the slavery of the British or French occupier according to the nature of the occupation, so our dumb peoples believed them, without looking at their fighting doctrine and training methodology and its education and over all that the doctrine of its leadership and their loyalties that sway between the East and West who agree on the initial hostility to Islam and their absolute refusal for any real revival for this Ummah that has been absent from the arena of history.

We have believed these leaderships that are westernized and hostile to our religion and Aqeeda, and opened our family records to recruit our sons in their ranks without a price, under the pretext of soldiery and obligation of defending the country, to find after bitter experiences that we were pushing our sons to our doom in the hand of the corrupted corrupting leaderships, that seized power, and turned the arms which they were entrusted on it to protect the people and country, to a killing machine against the sons of the country, and a tool to control the power, and live over the law, away from any oversight or accountability.

What is happening today in Egypt by the hands of the gangs of the Al-Sisi is a mirror image to what happened 22 years ago on the hands of the gangs of (Khalid) Nizar in Algeria which its chapters continue to this day:

Confiscating the will of the people, mass killing as the whole world saw and listened (despite that the image is more obvious in Egypt due to the new media reality), extrajudicial kidnapping and assassinations, subjugating the judiciary and the scholars of the authority to justify and execution of the crimes, collusion of the Arab governments (Al Salool –Saud- have an advanced stand in both cases) and a suspicious silence for the claimers of freedom in Europe and America, accusing the weak party with terrorism, intimidating the West from the arrival of the Islamists to power and their threatening of the world peace and security, and they are the same slogans which the criminal Bashar Al-Assad is trying to promote in the market of lousy politics, that complicit on fighting the freemen all over the world, under the dome of the United Nations to crush the peoples, and the hostility doubles if the freemen were real Muslims not just Muslims by the name, as the case of the apostate rulers of the Muslims, who are loyal to the Kuffar and who complicit with global Kufr system to crush every sincere Islamist will that work to liberate our wounded Ummah from the shackles of slavery to the local and international Tawagit.

The crimes of the Arab armies against their peoples, pushes us more than ever before, to reconsider these armies beginning with determining its role, and ending to its human composition, passing by its programs, methodologies, budgets and powers.

The time has come to return these armies to their real size, and subdue it to accountability and questioning like any establishment of a state that respects its people; there is voice higher than the voice of the law that emerges from the religion of the Ummah and its Aqeeda and there is no establishment higher than its will.

The one who observes these desolate armies sees gruesome similarities between it

1. Its corrupt methodologies: all of it without exception are secular trend and approach and hostile to the religion of the Ummah and aspirations.
2. Its formation on the basis of blind obedience for the military commander in the highest regimentals, and putting his obedience before the obeying of Allah and His messenger, and it

executes any order without referring it to the Book of Allah and the Sunnah of the messenger of Allah peace and blessings of Allah be upon him or even to their military law itself, they are armies ruled by the immediate desire of the commander, under the pretext of obeying the orders of the military, even if it contradicted the orders of Allah.

3. They are part from the global military and security system, and its fate is linked through multilateral and bilateral alliances, which undermine its will, movement and freedom.

4. They live above the law and do not subdue to accountability, rather it is they who make the laws and make presidents and determine the policies, according to loyalty of their corrupt leaderships and rotten supporters, in Russia or Europe or America.

5. They are a tool of military and security penetration in the hands of the enemies of the Ummah, which turned the lands of the Muslims to military bases and security stations and secret prisons that stifle our breaths and control our fate.

6. They are legions belonging to the crusader armies which move them as whenever they want and the way they want under the pretext of international legitimacy and counter-terrorism.

7. Corrupt leaderships that do not subdue even to the military law, like the retirement law for example, which the ordinary military men from the sons of the people are subject to it, and who observes the files of the commanders of the Arab armies finds that they have exceeded the age of retirement by several years, rather some of them is near the end of his ninth decade, as in the case of the Algerian defense minister the elderly Gaïd Saleh which is a cunning policy, for these armies to be always in the hands of criminal gangs that are outside all the laws, including the military law itself, which is contrary to the in force laws in all the countries of the world, where the age of retirement applies on all.

8. They are a tool to ensure the backwardness of the Ummah and restrain it in various fields, due to their control of the reins of power and drawing the policies, so it broke all the military, economic and cultural projects that are worthy to achieve a qualitative development, to please the enemies of the Ummah and religion, who found in these corrupt leaderships, the shortest way to subjugate our will with the lowest price, and it found in our weakness and subordination the easiest mean to rule and crush us.

Don't we have the right after this clear deviation and what resulted from it from horrible crimes by every standard to ask about the legitimacy of these armies and its real role? Do we still have in it even the slightest confidence, to trust them according to it to protect us as their great criminals claim?? And can we trust them after all these crimes on our weapons that are obtained at the expense of the milk of our children? Do we still have confidence to push our sons to its ranks for recruitment and contract?? And can we any longer live isolation from weapons after all these crimes against our sons, honors and money??

Our crime against ourselves is not lesser in any way from the crimes of the military against us, rather the crimes of those criminal people, is an inevitable result for our abundance to the lowest elements of manhood, which is owning individual weapons to defend ourselves and children, and have a honorable death protecting the religion, honor and money, if the Algerian people owned arms, when their non-commissioned officers in the French army dominated over them, who turned with false promotions to generals, and if the Syrian people had owned arms, the vengeful Nusayri Bashar wouldn't have displaced them and subjected them to severe torment, and if the grandsons of Amr ibn Al-Aas in the land of Kinanah had owned arms, the coward Al-Sisi wouldn't have dominated over them and those who lack religion and morals wouldn't have dominated over you the cheap thugs, subjecting you to severe torment, so we ask Allah that these bitter experiments a lesson for the new generations to think about its weapons before its thinks in its food and employment, because it is the only guarantee to remain alive, in a world that only understands the sounds of bullets and only respects the heavy boots, (and Allah is the master of His affair, but most people do not know), Wa Alhamdulillahi Rabbi Alalameen.
